

AMER KAZIMOSKI

FULL STACK DEVELOPER

E-Mail: amerkazimoski@outlook.com

Github: github.com/DjCustomm

PROFESSIONAL SUMMARY

Driven and innovation-focused aspiring Full Stack Developer with hands-on experience across the complete development stack — from relational databases and backend logic to responsive front-end interfaces. What sets me apart is a demonstrated mastery of AI integration and prompt engineering, leveraging large language models as a force-multiplier to accelerate delivery, sharpen code quality, and solve complex problems faster. Backed by real-world internship experience in Italy and an international placement in Malta, I bring a global perspective, strong adaptability, and a builder's mindset to every project I join.

TECHNICAL SKILLS

Languages	Java C# JavaScript HTML CSS SQL PHP
Concepts	Object-Oriented Programming (OOP) Backend Logic Frontend Fundamentals Relational Databases
AI & Tools	AI Integration & Prompt Engineering (Expert) — LLM APIs, AI-Accelerated Development, Code Debugging via AI tooling, GitHub
Languages Spoken	Italian English Macedonian

PROFESSIONAL EXPERIENCE

IT Intern — International Placement

2026

International Internship, Malta

- Operated within a cross-cultural, international team environment, applying practical IT skills to real-world business operations.
- Supported software and hardware deployments, adapting to new systems and workflows with minimal onboarding time.
- Strengthened professional communication across multicultural settings, broadening global industry perspective.
- Contributed to technical troubleshooting tasks, demonstrating initiative and reliability in a foreign-language work environment.

IT Intern

2025

AreaFox, Pianzano, Italy

- Developed and maintained internal software components, contributing directly to production-grade codebases.
- Diagnosed and resolved hardware and software issues, reducing downtime and improving team operational efficiency.

- Assisted with internal tech operations including network configurations, device management, and system maintenance.
- Collaborated with senior technicians to implement process improvements and document technical procedures.

PROJECTS

Client Websites | [HTML](#) · [CSS](#) · [JavaScript](#)

- Designed and delivered multiple professional websites for real clients, translating briefs and business needs into polished, responsive web experiences.
- Built each site from scratch using semantic HTML, modern CSS layouts (Flexbox/Grid), and vanilla JavaScript for interactivity.
- Managed the full client lifecycle — from requirements gathering and wireframing through to deployment and post-launch revisions.
- Ensured cross-browser compatibility and mobile-first responsiveness across all delivered projects.

Browser-Based Web Game | [HTML](#) · [CSS](#) · [JavaScript](#)

- Conceived and built a fully playable web game as a school project, implementing core game logic, collision detection, and a scoring system entirely in vanilla JavaScript.
- Designed engaging game mechanics and a clean, intuitive UI to maximize playability within a browser environment.
- Applied DOM manipulation and event-driven programming techniques to deliver smooth, real-time gameplay.
- Presented the finished project to teachers and classmates, demonstrating both technical execution and creative problem-solving skills.

EDUCATION

High School Diploma in Information Technology

Expected June 2027

ITT Città della Vittoria, Italy

- Specialisation in software development, networking, and IT systems engineering.
- Coursework covers Java, C#, databases, web development, and computer science fundamentals.

ADDITIONAL INFORMATION

- Open to remote, hybrid, and relocation opportunities across the EU and internationally.
- Continuous learner — regularly engages with developer communities, open-source projects, and AI research.
- GitHub profile: github.com/DjCustomm — actively maintains personal and academic projects.
